

PRESS RELEASE

September 26, 2023

InCyber Forum North America, October 25-26, 2024 Montreal Convention Center

After the significant success of its inaugural event, the InCyber Forum is set to return on October 25 and 26, 2023, in Montreal. This event underscores human values in a trusted digital space. Supported by the Quebec government, federal authorities, and the city of Montreal, this leading cybersecurity event will highlight international key industry players and their visionary initiatives to ensure a safer digital space.

THE INTERNATIONAL
CYBERSECURITY FORUM
BECOMES

IN CYBER
FORUM

OCT. 25-26, 2023

PALAIS DES CONGRÈS - MONTREAL

5,000 ATTENDEES EXPECTED

The InCyber Forum has quickly become a pivotal hub for international collaboration in the cybersecurity sector. Its core mission is to connect and deepen ties between Canada, the United States, Europe, and other regions, with a keen focus on fostering digital trust.

As anticipation mounts for the second North American edition, the forum has a lineup of globally renowned guests that adds depth and diversity to the event. The U.S. will be prominently represented by a significant delegation from Texas, highlighted by key figures such as Juan Antonio Flores, EVP for Government Affairs at Port San Antonio, and esteemed representatives from agencies like the FBI and NSA.

Canada's cybersecurity landscape will also be in focus, with Mr. Eric Caire, Quebec's Minister of Cybersecurity and Digital Affairs, and Sami Khoury, Director of the Canadian Center for Cybersecurity, lending their expertise.

The international scope of the event extends to Europe and other parts of the world. Attendees can look forward to insights from experts such as Marcos Gomez Hidalgo, Deputy Director at

INCIBE-CERT, and Michel Van Den Berghe, President of the Cyber Campus in Paris, a project initiated by President Macron.

Industry giants, including Microsoft, Trend Micro, IBM, and Sentinel One, are slated to attend. The forum will also spotlight cybersecurity experts from esteemed entities such as Google Cloud, Meta, NBA, and the National Bank of Canada. With such a convergence of thought leaders, the anticipated 5,000 attendees can expect profound discussions and unparalleled networking opportunities.

DELVING INTO HOT TOPICS

Current hot topics are on the agenda, from ethics and the security of industrial processes to artificial intelligence and the sector's appeal.

In April 2023, the FBI, in coordination with Europol and numerous international partners, disrupted the online criminal marketplace known as Genesis Market. This was achieved through coordinated actions targeting the service and its users. The "Cookie Monster Operation" will be the subject of a panel discussion featuring its very own protagonists: Amanda J. Knutson (FBI), Marcello Zanini (Europol), Brian Abellera (FBI), Chris Lynam (NC3), and Andrée Dupuis (Quebec Safety).

This is just a glimpse of what the program offers. Attendees will experience 6 thematic scenes, a hacking lab, a pitch lab, and an exclusive gala cocktail at the Saint James Theater for VIP badge holders.

KEY FIGURES

5,000 visitors | 200 exhibitors | 250 speakers | 36 countries

COMMITMENT TO DIVERSITY

Aligned with its commitment to diversity, 50% of the InCyber Forum's speakers are women. The "Future Talents" initiative aims to introduce youth to cybersecurity and generate interest in this forward-looking sector. Over 1,000 Montreal teens are invited to a day of engaging activities centered around these themes, supported by the CyberCap association.

ABOUT THE INCYBER FORUM

In 2025, the InCyber USA Forum will relocate to San Antonio, while Kuala Lumpur will host the APAC edition. Not to forget the annual gathering of the InCyber Forum in Lille, which, over 15 years, has become the most prominent cybersecurity and digital trust event in Europe, boasting 20,000 participants, 650 private and public sponsors, 530 speakers, and representatives from 82 countries. The next edition will take place from March 26-28, 2024.
