Opening speeches

Éric CAIRE

Minister of Cybersecurity
and Digital Affairs of Quebec, Canada

- ☛ *The InCyber Forum is a major event, a global event.*
- ☛ *For me, this is the embodiment of the cyber defense network that we must deploy worldwide.*

The Honourable Dominic LEBLANC

Minister of Public Safety, Democratic Institutions
and Intergovernmental Affairs of Canada

- ☛ *By working together, we the government of Canada, believe we can collectively create a digital landscape where individuals are empowered, accurate information prevails, and our democratic processes are resilient to these increasing attacks.*

OCT. 2023
PALAIS DES CONGRÈS

They say it better

“ This is my first time attending the InCyber Forum, and I am blown away, not only by the level of organization, the caliber of the speakers and the attendees, but more than other conferences, we are able to go deeper into the conversations. This conference facilitates those conversations in a meaningful way.

Leah MCGRATH
Executive Director, StateRAMP

“ We should never underestimate the impact events like this can have. It brings in people from different sectors, regions, and perspectives to discuss really important issues. From our perspective, it is a wonderful opportunity to talk about how space will play a crucial role in the future of cybersecurity. I already marked the dates for next year!

Brian GALLANT
CEO, Space Canada

“ This is an amazing place where not only we are here to talk about cyber, but also to build partnerships. I appreciate the opportunity to be invited here for the second time. Not to be missed! It's a superb event and a superb community.

Sami KHOURY
Head, Canadian Center for Cybersecurity

“ InCyber Forum is putting the information out there. The human part of cybersecurity is what we should be putting at the forefront. Once we have the understanding of who we are, we can build anything.

Tashya DENOSE
Reality Labs Security Program Manager, META

“ What I take away from this is the amount of diverse cybersecurity professionals who have come together and collaborated. Different countries, different languages, but all with the intent of protecting consumers.

Shinesa CAMBRIC
Author, Senior Leader of Digital Identity Cyber Defense, Microsoft

“ It is an ongoing global effort. We are understanding we have entered a time where the physical world and the cyber world are colliding. What I have noticed from my time here is a very collaborative environment. People are more than happy to engage

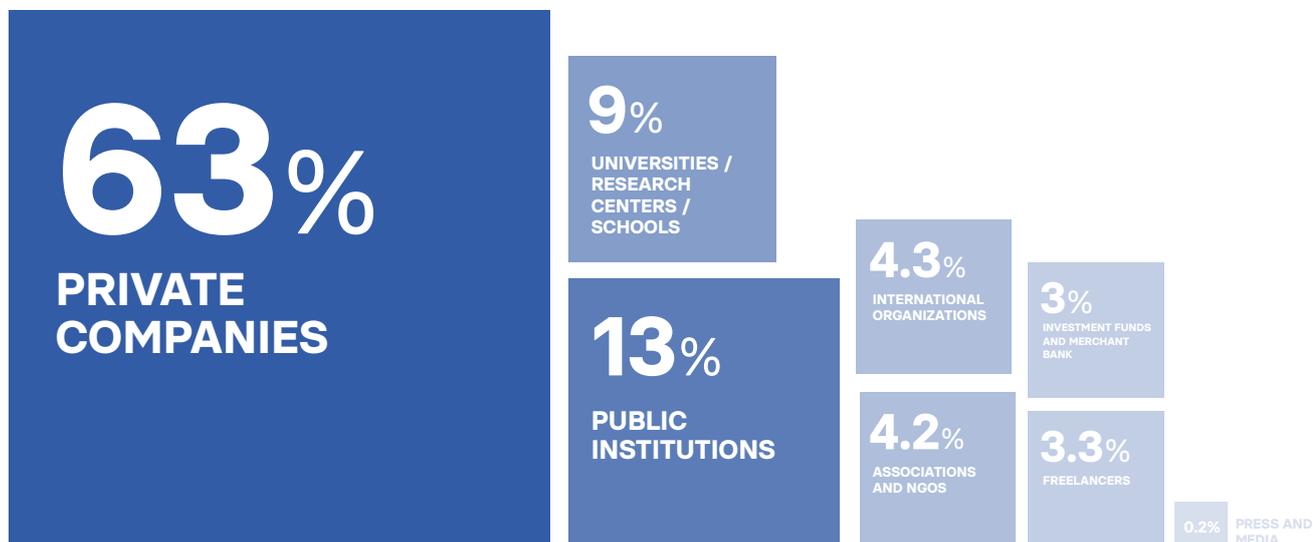

Howard MARSHALL
Global Cyber Intelligence Lead, Accenture

“ It has given me the opportunity to meet people and form deeper conversations than most conferences that I attend.

Nancy RAINOSEK
CISO, Government of Texas, USA

100 participants

InCyber Immersion

☛ *This was an excellent kickoff to the forum. We were able to get into deep discussions about important topics and network with others, which lead to further conversations throughout the next two days.*

Nancy RAINOSEK

CISO, State of Texas

☛ *I greatly appreciated the stimulating exchanges with the other speakers on the need to place ethics at the heart of cybersecurity to ensure a more sustainable cyber world. The issue is extremely urgent and the various roundtables showed how much all the actors are working to create a digital environment of trust, guaranteeing flourishing and secure online exchanges.*

Éric SALOBIR

Président, Human Technology Foundation

Next year at InCyber Forum North America

October 29 – 30, 2024 Montreal, Quebec (Canada)

SAFEGUARDING THE DIGITAL REALM Scenes and themes for 2024 – 8 STAGES

Unite InCyber

Main stage dedicated to high-level summits and keynotes - focusing mainly on cyber issues

INFOSEC

Information security

Cybercrime

Threat intelligence, fight against cybercrime

OT Sec / Critical Infrastructure

Operational technologies, ICS & Critical Infrastructure protection

Smart Transportation

First day dedicated to aerospace (partnership with ICAO) - Second day dedicated to cross visions between aerospace, ground & maritime transportation

Trust & Safety

Maintain and promote security on the internet and create a trustworthy environment for users

Web3 Security Summit

Brings together Web3 specialists and security experts to work on all the trust and compliance issues linked to Web3 technologies - blockchain, smart contracts...

Demo lab

Technical presentations and demonstrations
- Ethical hacking, forensic, research
- Demonstration of products, solutions and services
